DIGI-VIEW 4

Four Channel Day/Night CCTV system with integral digital recording

DIGI-VIEW 4 offers a comprehensive digital CCTV solution for home or business use. The cameras, suitable for exterior or interior use without any additional housing, offer clear colour images during the day and crisp infra red illuminated mono images at night. Also included in the system is a high capacity digital video recorder which allows simple control, recording and viewing of images whilst also providing power for the cameras. To complete the system a cable is included for direct connection to a standard television or an optional dedicated CCTV TFT monitor.

DIGI-VIEW 4 offers the user many recording options in order to optimise the 160Gb of record space available, there is even built in motion detection which looks for movement on screen, without need for additional equipment, to trigger a record session.
